Risk Management and Technology Advisory

In an increasingly uncertain world, businesses must navigate a range of complex threats — from cyberattacks and geopolitical risks to climate concerns and operational disruptions. At Andersen UAE, we help clients proactively respond to this evolving risk landscape through modern, tech-enabled strategies that enhance governance, resilience, and operational continuity.

How We Help

We take a holistic, enterprise-wide view of risk and governance. Our multidisciplinary teams work with clients to understand vulnerabilities, strengthen frameworks, and implement controls that ensure stability, adaptability, and regulatory alignment.

Our Services

Enterprise Risk Management
› Risk assessments across finance, operations, compliance, cybersecurity, and technology
› Design of integrated risk mitigation strategies and controls
› Risk reporting aligned with business and stakeholder expectations

Assurance & Controls Evaluation
› Independent operational and technical reviews of key controls and business processes
› Identification of process design gaps and testing of control effectiveness
› Enhanced oversight to support risk reduction and actionable recommendations to strengthen business resilience and compliance.

Governance Advisory
› Development of governance frameworks and board charters
› Policy design for regulatory compliance, ethics, and accountability
› Enhancement of transparency and executive decision-making structures

Compliance and Regulatory Advisory
› Evaluation of regulatory requirements and readiness
› Compliance reviews and maturity assessments
› Advisory on local regulations and international standards

Business Continuity and Crisis Response
› Creation and testing of Business Continuity (BC) and Disaster Recovery (DR) plans
› Crisis response frameworks, escalation mechanisms, and stakeholder communication
› Tabletop exercise and recovery preparedness

Process Optimization & Re-Engineering
› Analysis and redesign of existing business workflows
› Efficiency mapping and process automation opportunities
› Documentation and implementation support

Cybersecurity and Privacy
› Security risk assessments and posture management
› Design of cybersecurity governance frameworks
› Data privacy and protection
› Cloud Security Services

ERP and Technology Enablement
› IT & Digital Strategy
› AI Governance & Security Frameworks
› ERP Strategy & Transformation
› Digital Transformation Services

Training and Capability Building
› Custom workshops on enterprise risk, compliance, IT Frameworks, cybersecurity, and governance
› Scenario-based training and simulation exercises
› Risk awareness and culture-building programs
